CONTENTS

Download mobile application Mala GPS

The **Mala GPS** mobile application can be downloaded free of chargé on **Google Play** or **AppStore** depending on the model of your mobile device.

The first launch of the mobile application

The mobile application is launched by clicking on the **Mala GPS** mobile application icon in the menu of installed applications.

Creating a new account

After launching the mobile application for the first time it will be necessary to create a new login account. In order to do this, please click on the **Create account** link.
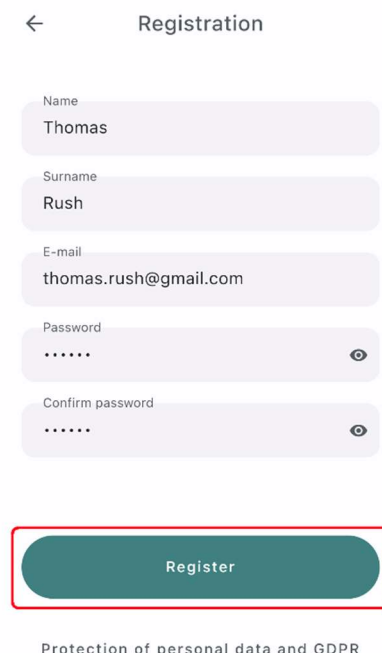

Now fill in the following details: **Name**, **Surname**, **E-mail** and **Password** and confirm this information by clicking on **Register.**

For successful completion of registration, it is necessary to **verify** that the e-mail stated is really yours. Go to your e-mail inbox and confirm this by **clicking on the link shown in the verification e-mail**.

Login to the mobile application

If you have already created your login data, you can log in using this by entering the **E-mail address** and **Password** onto the home page of the mobile application. If you want log in to be carried out automatically when entering the application again, click the box **Remember login.**

Clicking on **Login** will log you into your account.

Renewal of forgotten password

If the situation occurs that you have forgotten the password to your account, you can renew this by clicking on **Have you forgotten your password?** on the login display.

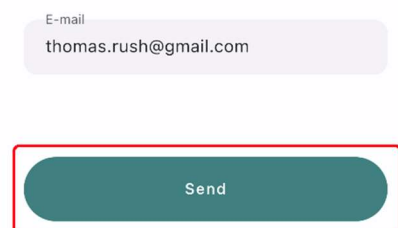

Now enter the **e-mail address**, to which you want to renew the password and within a short time a link for renewing the password will be sent to you at this e-mail address.

Log out from the application
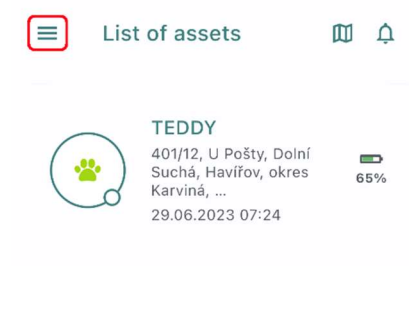

To log out from the mobile application, click the **three lines** icon situated on the top left corner of the List of assets page. A menu will appear on the left-hand side of the display.

On this menu now click on the option **Logout.**
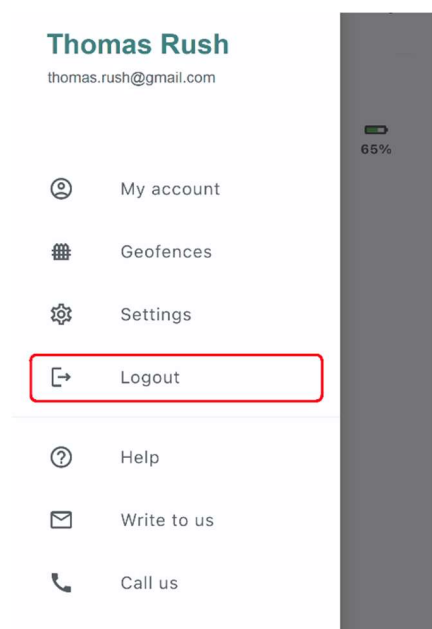

Adding new trackers to the mobile application

Add your tracker to the mobile application by clicking on the **Plus** Icon in the bottom right corner.

Now fill in the following tracker details: **Serial number** and **code,** or click on the option **Scan code using camera** and simply scan the tracker pictogram by using a camera – this automatically enters the serial number and code.

Clicking on **Continue** will complete this process.

Setting tracker profiles

After adding a tracker, it will first be necessary to **name** the tracker (any name can be chosen).

Name your new asset and choose for what
usage it will be utilized

Name of asset
TEDDY

5/80

Change type:

Continue

Now it will be necessary to choose the tracker profile i.e. to set what the tracker will be used for.

Bike

Animal

Guarding asset

Personal usage

The option set is confirmed by clicking **Continue.** This completes the setting of the tracker.

Name of asset
TEDDY

5/80

Change type:

Continue

# Inserting your own photo into the tracker icon

To insert your own photo into the tracker icon, click on the tracker on the List of assets page.
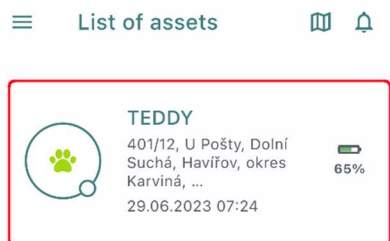

Now go to the bottom of the display, click the **Profile** tab and then click the **pen** icon in the top right-hand corner.

Now click on the **camera icon** and choose a photo from the photo album or take a new photo using the camera.

Uploaded photos and all changes made are **saved by clicking the floppy disk icon** in the top right-hand corner of the display.
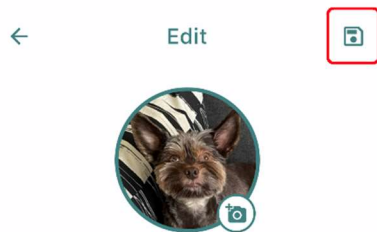

Subscription purchase

Subscription purchase is carried out by firstly clicking on the **three lines** icon in the top left-hand corner of the List of assets page. A menu will appear on the left-hand side.

Now click the **Tariff** option on this menu.
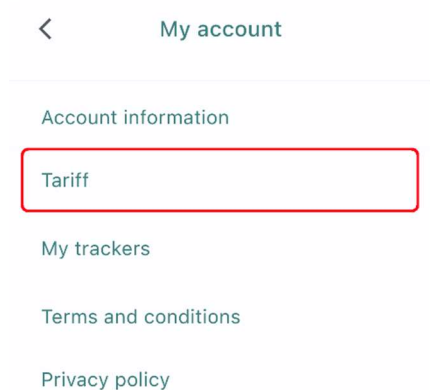

Now **choose the subscription for the specific tracker**. Subscription will be either **monthly** or **yearly**. Confirm your choice by clicking on **Buy subscription.**

Confirming the subscription purchase will redirect you to the payment gateway, where **it will be necessary to enter details of your credit card** and to then click on **Pay.**

After paying, you will be informed of the successful activation of the subscription and it will now be possible to use the tracker without any restrictions.
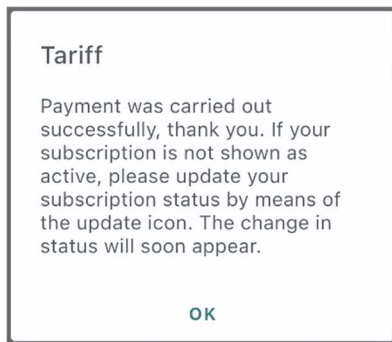

Attention! If you leave the payment process at any point during this, it will not be possible to repeat the payment process again during the following 30 minutes.

Tracker information on the main display of the mobile application

Tracker icons together with their names are shown on the List of assets page of the mobile application. You are subsequently informed of the last GPS location of the tracker together with the time of the last recorded GPS location. Battery energy level is shown to the right.

On the bottom right of the tracker icon there is a dot displayed which symbolises whether the tracker is moving or not. A white dot shows that the tracker is static and a green dot shows that the tracker is moving.

Working with the map background

It is possible to zoom in and zoom out of map backgrounds in the standard way by using two fingers which you either drag apart or close together as needed.

The map background can be changed by clicking **Layer.** It is possible to choose between basic map backgrounds, satellite shots and hybrid maps.
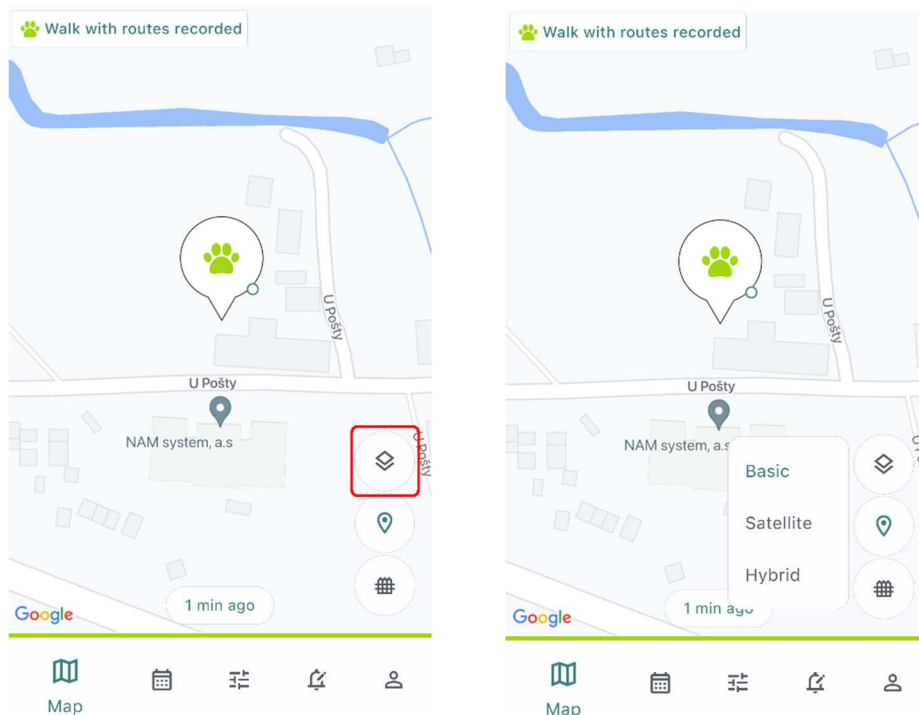

Centring the tracker on the map

When the map background is opened, the map is **centred on the tracker** (default setting) and the "d**rop" icon** is displayed.
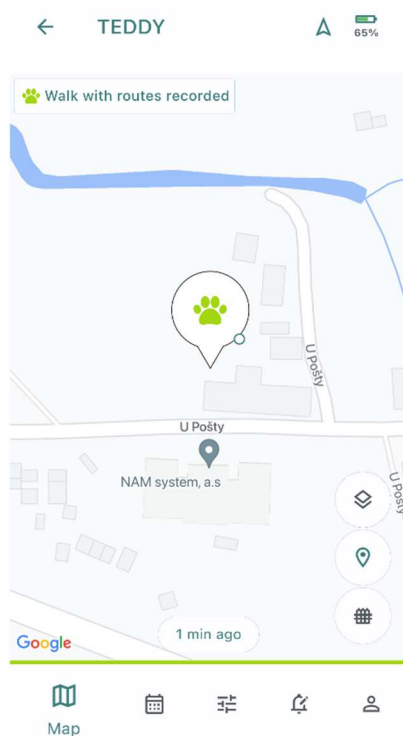

After clicking on the **centring icon,** a menu is displayed which allows you to choose whether the map will be centred on the tracker, the mobile telephone or on both devices together.

Attention: For the centring feature to work correctly, it is necessary that the mobile telephone or tablet has got access to location permitted. If not, it will only be possible to centre to the tracker.

Display and concealing of geofences

Geofences created can be either displayed or not displayed on the map background. This change in geofence visibility can be carried out by clicking the **geofence icon.**
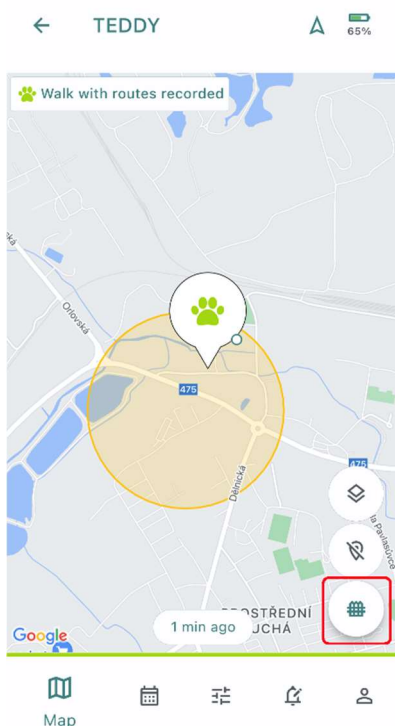

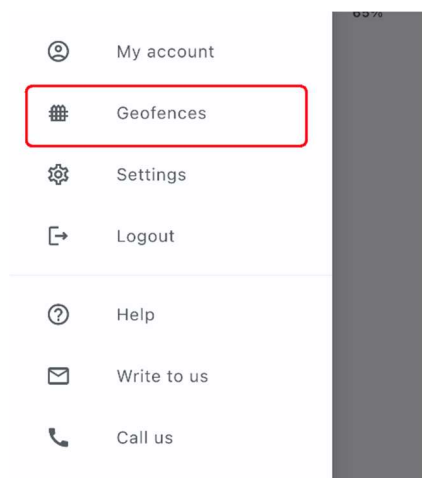

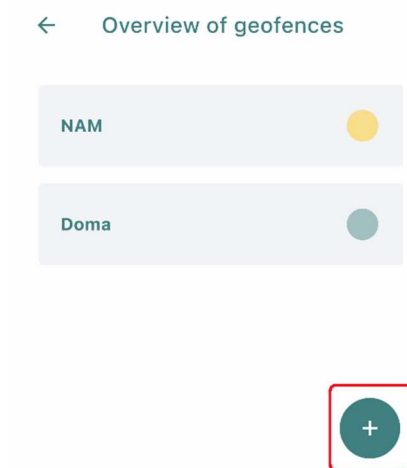

Creating geofences

To add a new geofence, first open the left-hand side menu by clicking the **three lines** icon.

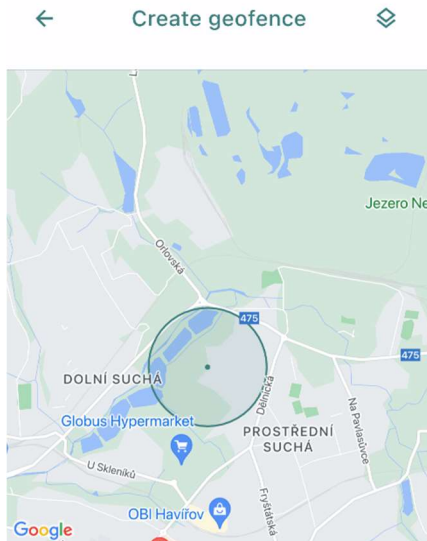

Now click on the option **Geofences.**

In the geofence overview, create a new geofence by clicking on the **Plus** icon at the bottom of the display.

Geofences are created by clicking on the specific point on the map where the geofence should be.

By using the **slider** at the bottom of the display, now set the size of the circle (geofence). Name the geofence and, if desired, you can choose the colour of the geofence by clicking on the **colour dot/bar** under the name of the geofence.

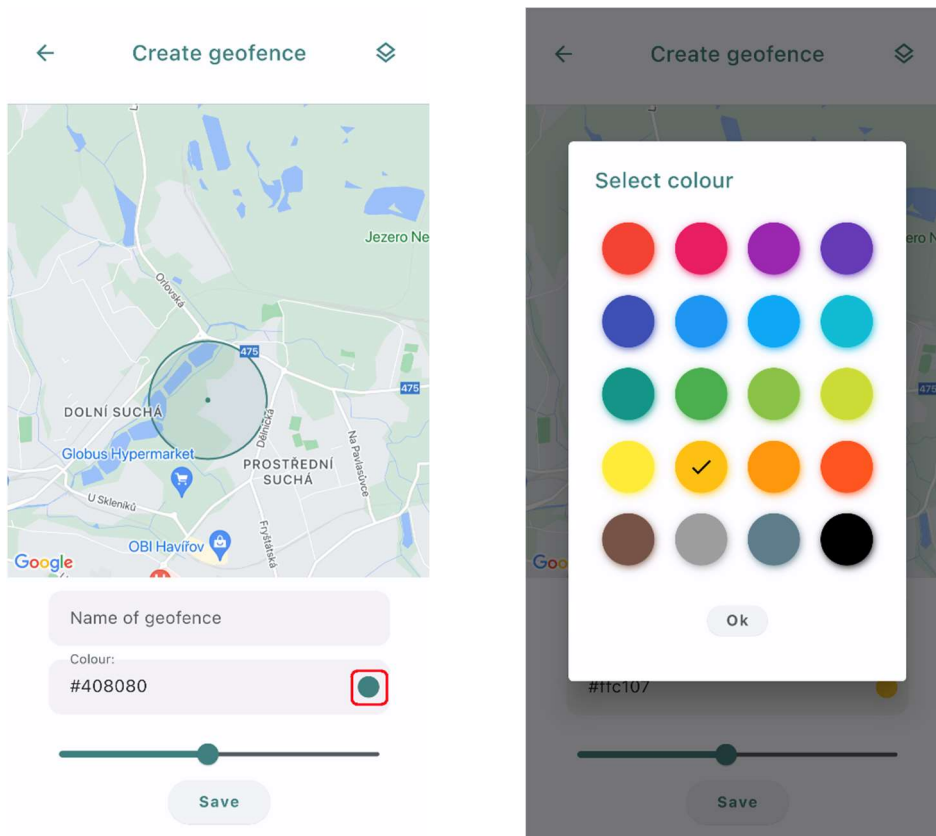

The created geofence is saved by clicking on the **Save** icon at the bottom of the display.

Navigating to the tracker location

If you need to navigate to the location of your tracker, click on the specific tracker and then on the **Map** tab click on the **Arrow** icon in the top right-hand corner.

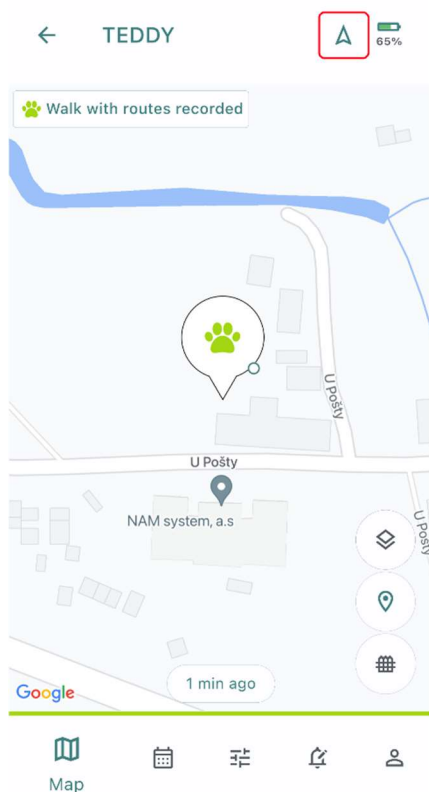

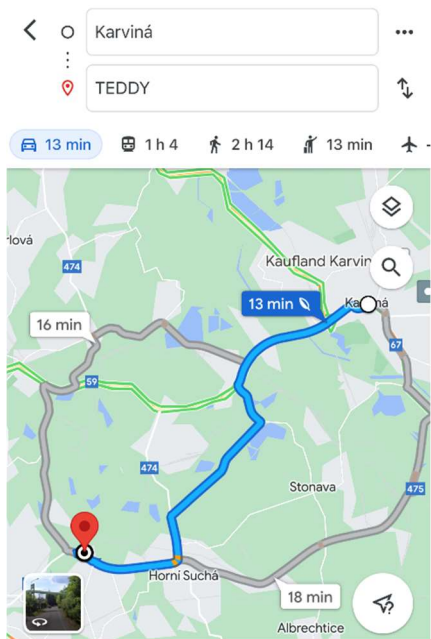

Now choose **which application** you want to use for navigating. The range of applications available is dependent on which navigation applications you have got installed on your mobile phone.
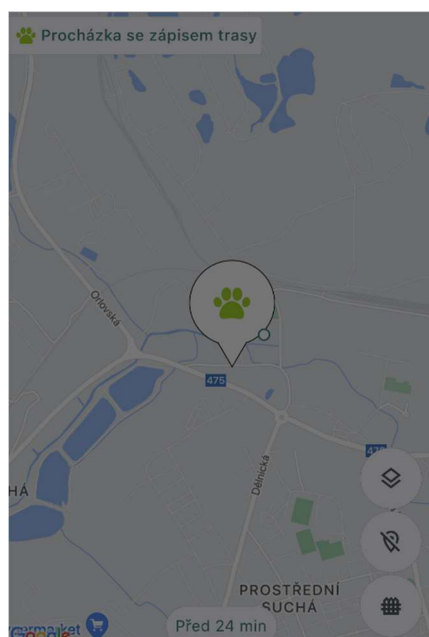

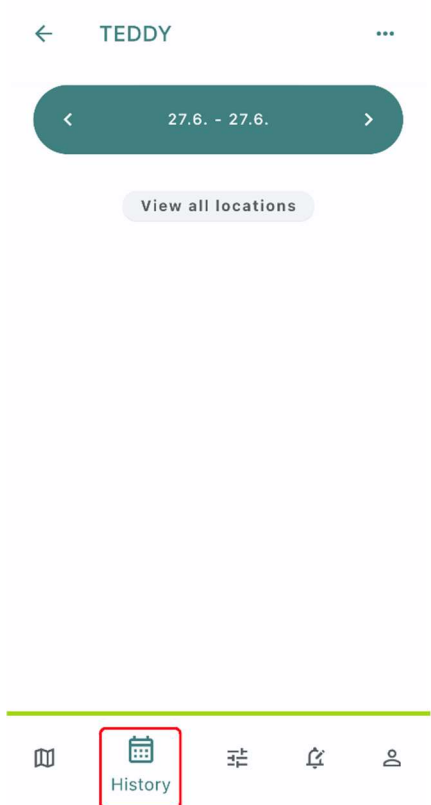

Now continue with navigation to the tracker in the normal way according to the mobile application for navigation that you have chosen.

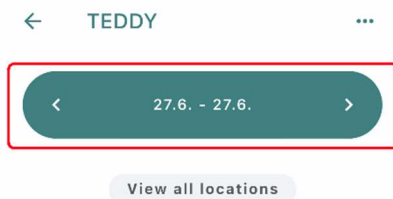

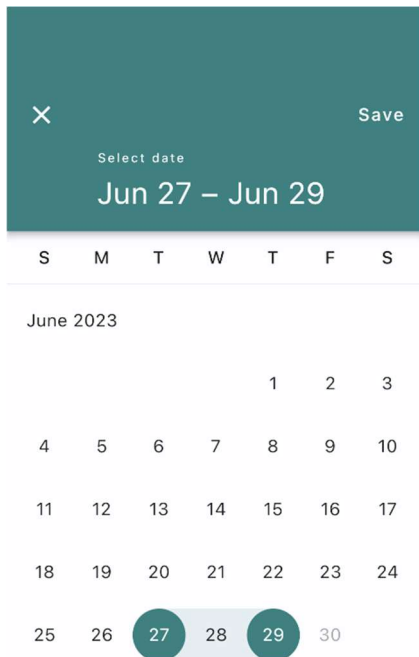

Working with trips history

To display the history of specific trips, click on the chosen tracker and then go to the **History** icon at the bottom of the display.
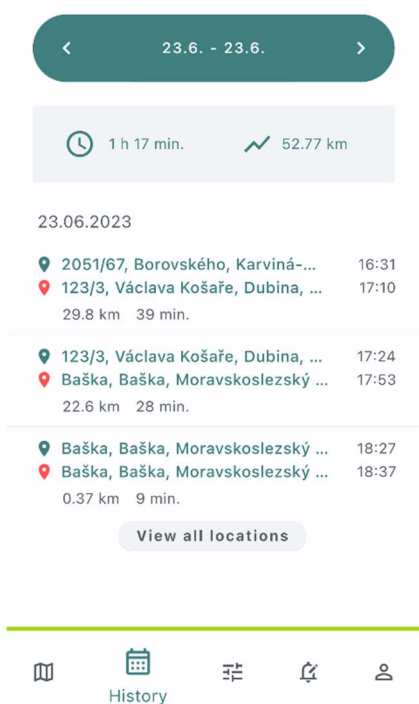

In the top bar, select the period for which you want to display trips made.

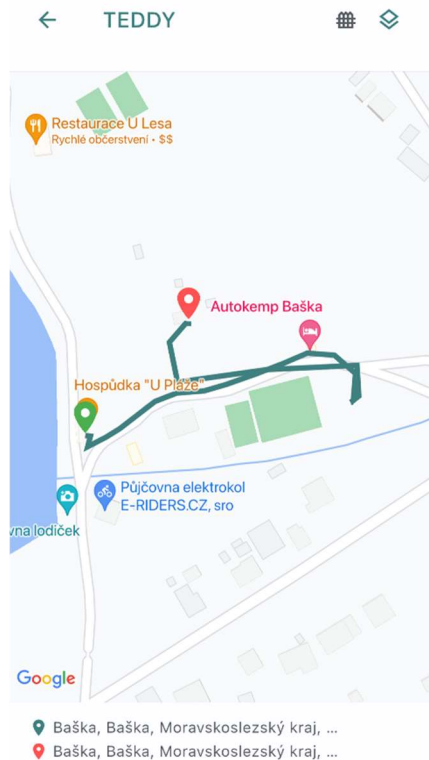

History of trips can be displayed back **from the beginning of time**. It is possible to choose a **period of a maximum of 31 days** at one time.

Now a list of individual trips made during the chosen period is shown.

It is possible to **display trips graphically** on the map background by clicking on the specific trip.

## Setting operational modes of the tracker

The MALA tracker **can be set in several operational modes**, which then influence the behaviour of the tracker itself. The availability of specific modes depends on which profile the tracker is set in. To set a specific mode that is suitable for the given situation, click on the tracker and go to the **Operating** tab at the bottom of the display**.**
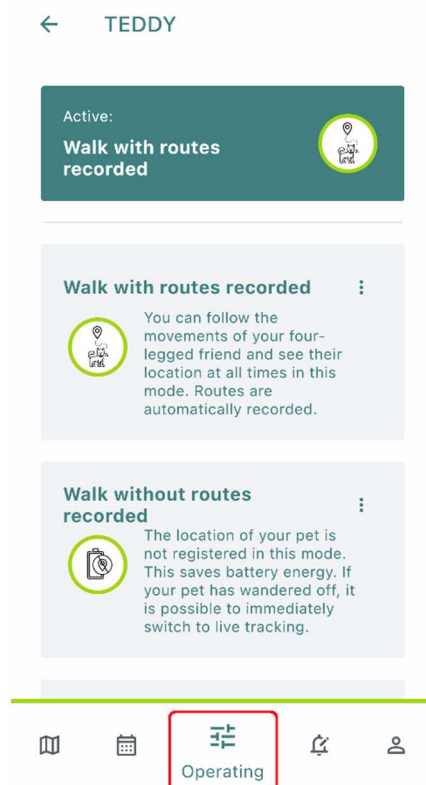

Select one of the modes shown and set this by clicking on it. Confirm the selection by clicking **Yes**.

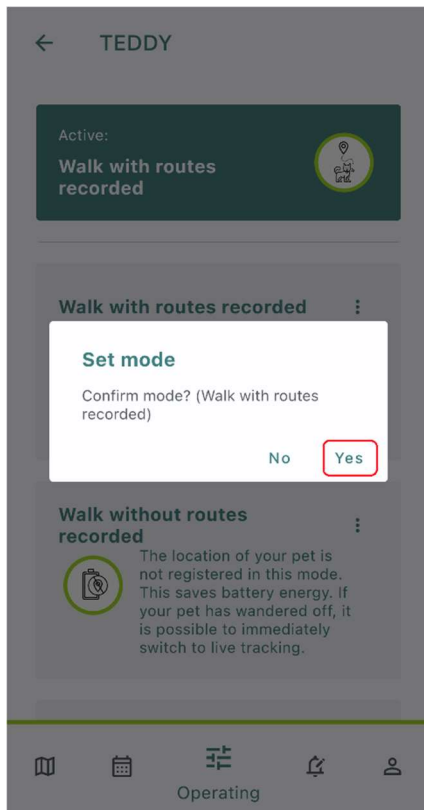

Setting PUSH notifications

For every tracker, it is possible to set several notifications of specific events. To set notifications, click on the specific tracker and then click on the **Notification** tab at the bottom of the display.

Using the sliders, now choose for which events you want active notifications.
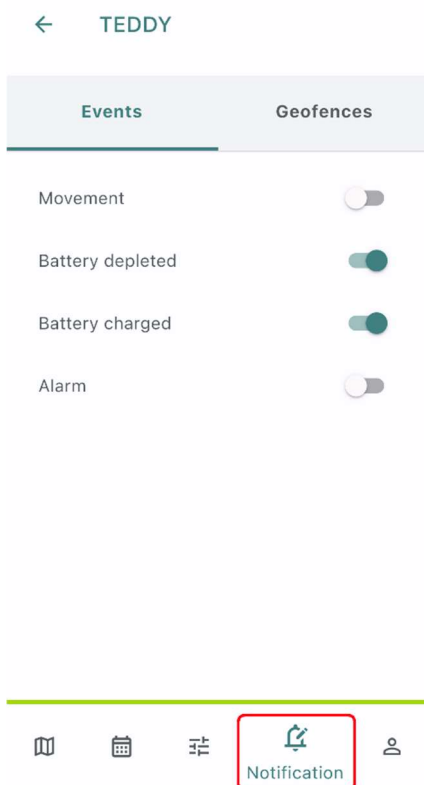

It is also possible to set notifications for **geofences** by going to the **geofences** tab at the top of the display. It is possible to set notifications separately for each of the geofences that you have created.

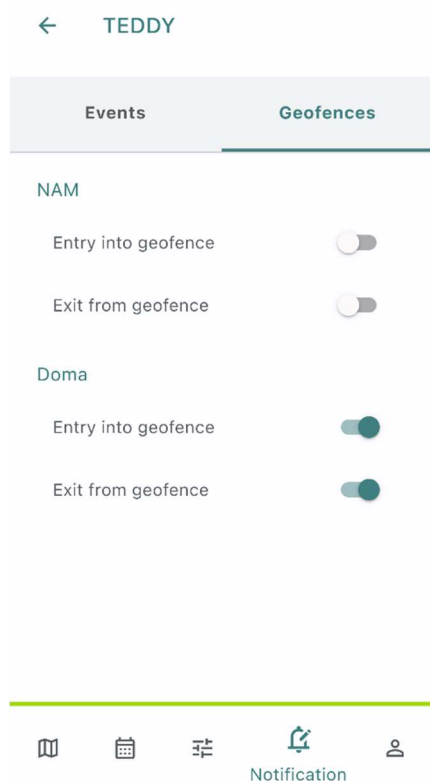

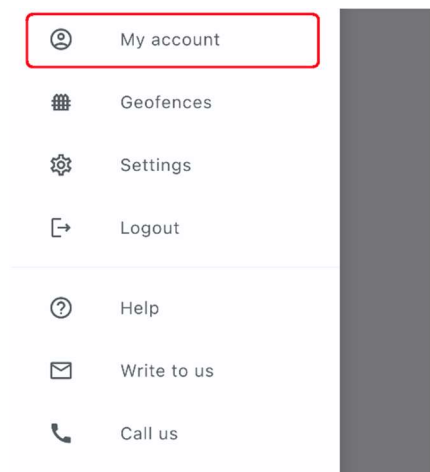

Display of personal data (information of account)

To display and edit your personal data, go to the left-hand menu on the main display of the application (by clicking on the three lines icon in the top left corner of the List of assets page).
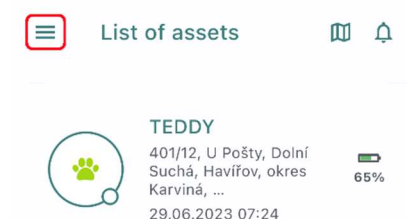

Now click on the option **My account.**

In the newly displayed menu click on the option **Account information**.

Now you can view or, if necessary, edit your personal (billing) data.
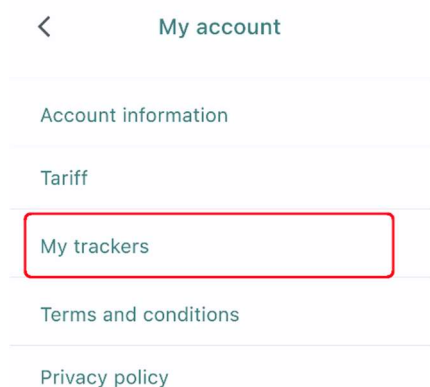

Displaying the serial numbers of trackers

To display the serial numbers of your trackers (for example to help resolve a problem with technical support), go to the left-hand menu on the main display of the application (by clicking on the three lines icon in the top left corner of the List of assets page).

Now click on the option **My account.**
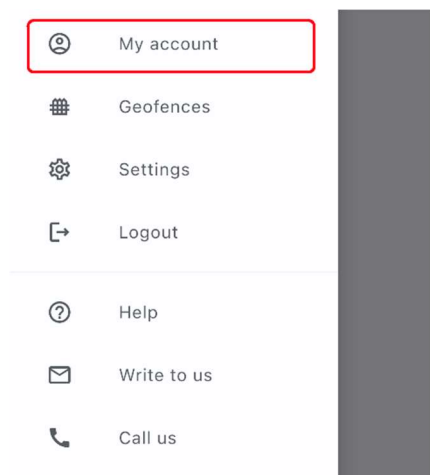

In the newly displayed menu click on the option **My trackers.**

Now you can view the serial numbers of all your trackers.

Display of terms and conditions

To display terms and conditions, go to the left-hand menu on the main display of the application (by clicking on the three lines icon in the top left corner of the List of assets page).

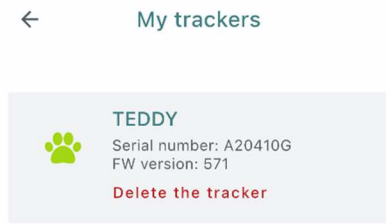

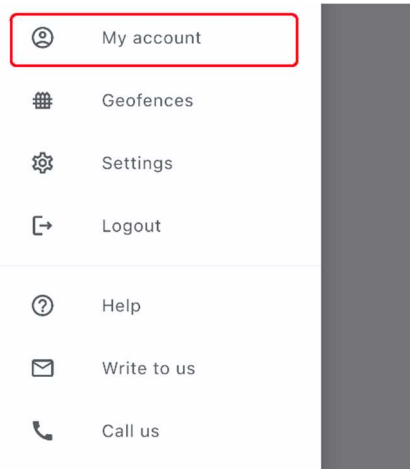

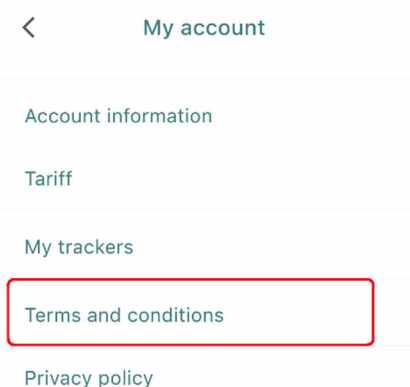

Now click on the option **My tracker.**

In the newly displayed menu, click on the option **Terms and conditions.**
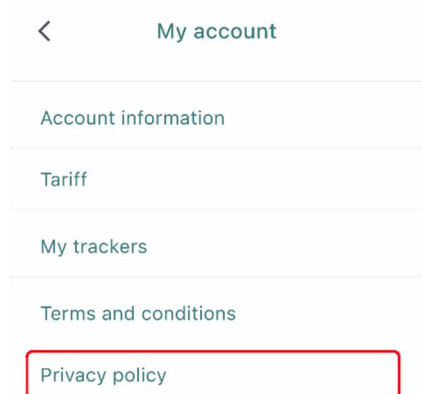

Display privacy policy

To display the privacy policy, go to the left-hand menu on the main display of the application (by clicking on the three lines icon in the top left corner of the List of asset page).

Now click on the option **My account.**

In the newly displayed menu, click on the option **Privacy policy**.
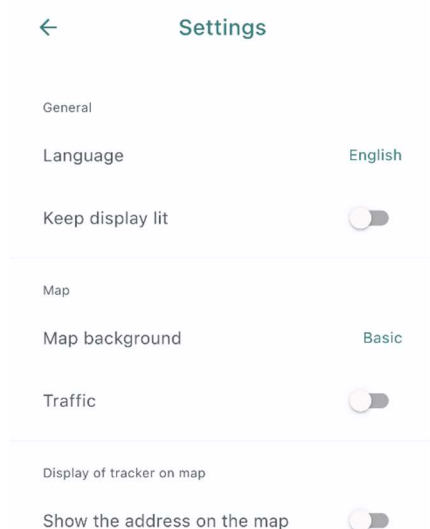

Setting the mobile application

To set the mobile application, go to the left-hand menu on the main display of the application (by clicking on the three lines icon in the top left corner of the List of assets page).

Now click on the option **Settings.**

In the newly displayed menu, you can carry out **application setting.**
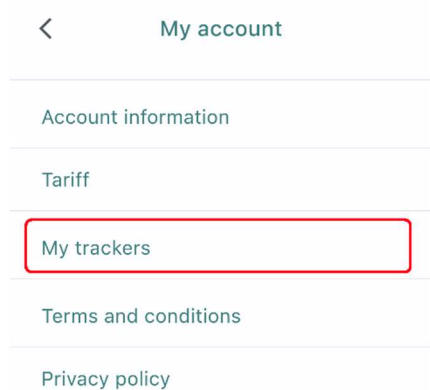

Deleting trackers from the mobile application

To delete trackers from the mobile application, go to the left-hand menu on the main display of the application (by clicking on the three lines icon in the top left corner of the List of assets page).

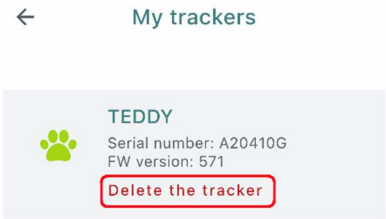

Now click on the option **My account.**

In the newly displayed menu click on the option **My trackers.**

Now click on the option **Delete tracker from application** on the specific tracker to be deleted.

Attention: Deleting the tracker from the application will lead to the deletion of all data including locations as well as the immediate cancellation of the existing subscription with no entitlement to compensation.
